Associate Professor Ulas Solmaz

Gynecologic Oncologist

Between 2002-2007, I completed my specialty training in Ege University Faculty of Medicine, Department of Obstetrics and Gynecology. Between 2011 and 2014, I specialized in Gynecologic Oncology Surgery at Tepecik Training and Research Hospital. In 2017, I received the title of University Associate Professor in Obstetrics and Gynecology.

Ulas Solmaz

The simplest, most cost-effective and most effective way to get rid of cancer is through regular cancer screening. Do not neglect cervical smear and gynecological examination once a year for cancer screening

gynecological examination once a year for cancer screening.

Dr. Ulas

Associate Professor

Laugh is the most beautiful, cheapest and useful medicine...

Together With Many Healthy Days...

Dr. Ulas performed my ovarian cyst 20 days ago. Laparoscopic operation, the region turned out to be open due to inflammation. During the surgery, he were trying to separate my intestines from the cyst. if another doctor performed this operation, it would have caused a great deal of damage to my intestines and internal organs. I could stand up a day after the operation. I don't know how to thank him. Patient follow-up, open communication, smiling face and confidence in a very difficult process with the least damage caused a process. I think a doctor with this ethical understanding and professionalism is rare. I recommend everyone with peace of mind.

Cancer is not the end of life!

You always smile. We will continue to be with you at every stage!
